

To Whom It May Concern:

NY Woodwork Inc. performed some renovation work for us and helped us redo our kitchen. Their work was exemplary and their execution was flawless. I would gladly recommend their services to anyone who is looking to get a professional job done on their kitchen or bathroom.

NY Woodwork, led by David, is customer focused and delivers on all of its promises. We had a fairly complicated job that included demolition of a wall, removing cabinets, installing new cabinets, and reconstructing the wall with new structures behind it. NY Woodwork did the entire job in record time. Their workers arrived on time, left on time, and never left a mess. We live in a co-op and a very fussy one at that, but we had no issues because NY Woodwork had all its paper work and insurance and they adhered to all the building rules. Their workers are honest and hardworking and even though we left our apartment open to them, none of our personal stuff was touched or missing.

Overall I will say that their eye for detail, superb craftsmanship, use of high quality materials, and innovative ideas for renovating make them the right choice for any structural or basic renovation work. I am definitely a customer for life and plan to use them shortly for redoing my bathroom.

Best Regards,  
Rohan Singh
