Dear Doron,

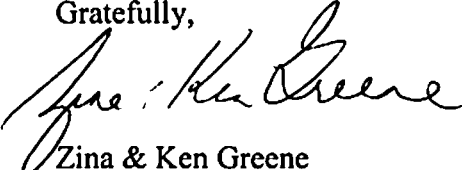

Thank you. Ken and I want to thank you again for our beautiful SECOND kitchen in two years. When we called you the day after our first beautiful kitchen was destroyed in a house fire, your concern and willingness to make our situation a priority made us feel that we again came to someone who understood our personal needs.

Needless to say, the fact that we hired you for a second time speaks volumes to your professionalism, timeliness and quality of your work. The beauty of working with you was that our kitchen is unique-all the cabinets were measured and manufactured to fit our space, as per our specific requirements and needs. Your installers were precise, clean and courteous. The installation was completed as scheduled. Your flexibility in working with our general contracted was also pretty impressive. When you say, "No problem," you mean it and deliver.

Furthermore, we had our first kitchen for over a year before it was destroyed. There were not any problems or repairs needed during that period. This again attests to the quality of your work.

Please use this letter as a strong recommendation to your future customers.

Gratefully,

  
Zina & Ken Greene
